# MPTC TARGET SCORING CRITERIA
(INSTRUCTOR)

In an effort to stress marksmanship, MPTC Firearms Instructors are required to perform at a higher level of proficiency than the typical officer. On the qualification course of fire, instructors are required to:

1. Score a minimum of 94% overall;

2. Score 100% at the 3, 5 and 7 yard line stages;

3. Maintain 100% round accountability. This means all rounds must strike the "body" area of the target defined by the grey IPSC silhouette target surrounding the traditional "Q" target area.

4. Miss no more than 2 rounds at the 15 yard stage and 1 round at the 10 yard stage.

The scoring criteria are explained below.

Hits within the "milk bottle" or "Q" area of the target score points.   This includes the pelvic scoring area including the border between the upper and lower areas.

Hits in the grey silhouette area do not score points however they are considered a "hit".

Hits outside the silhouette area are considered a miss and disqualifies the stage. The instructor is only required to re-shoot the stage which the round was fired on unless they miss on more than two stages in which case they will reshoot the entire 50 round course of fire.

## INSTRUCTOR REQUALIFICATION ONLY

MPTC TARGET SCORING CRITERIA
(Veteran Officer In Service)

In an effort to stress marksmanship, municipal officers falling under the MPTC training program are required to minimally perform to the MPTC Proficiency Standard for Firearms. On the qualification course of fire, officers are required to:

1. Score a minimum of 80% overall;

2. Score 100% at the 3 and 5 yard line stages;

3. Maintain 100% round accountability. This means all rounds must strike the target paper. At a future time this may be further reduced to the "body" area of the target defined by the grey IPSC silhouette target surrounding the traditional "Q" target area.

4. Score at least 4 hits from the 15 yard stage and 8 hits from the 10 and 7 yard stages. All ten (10) rounds must hit at the 5 and 3 yard stages.

The scoring criteria are explained below.

Hits within the "milk bottle" or "Q" area of the target score points.   This includes the pelvic scoring area including the border between the upper and lower areas.

Hits in the grey silhouette area and the outside border do not score points however they are considered a "hit".

Hits off the paper are considered a miss and do not meet the standard for 100% round accountability thus are cause for the officer to reshoot the stage.

VETERAN OFFICER IN-SERVICE REQUALIFICATION ONLY
